

Glenbriar Unifies Communications for Southern Alberta Fluid Systems Technology Inc.

VANCOUVER, BC – April 6, 2011 — **Glenbriar Technologies Inc.** (CNSX: GTI) announced the successful deployment of a ShoreTel Pure IP Telephony system for Southern Alberta Fluid Systems Technology (SAFST) of Calgary, Alberta. SAFST was looking for a communications solution that would unite their multiple sites throughout BC and Alberta and integrate with Microsoft CRM.

After considerable research into the available alternatives, SAFST selected Glenbriar as their solution provider. Glenbriar worked closely with SAFST to explain the technology, design the entire communications system, and seamlessly integrate with Microsoft CRM. SAFST chose the ShoreTel solution because it met or exceeded their business requirements that it be easy to use, easy to manage and could be deployed across multiple sites on a single image system.

“We had 6 branches all with different phone systems, which were not linked in any way,” noted Kenny Donaldson, IT Manager of SAFST. “The only way to communicate between branches was by old phone lines and long distance. With the new system, we have been able to increase inter-branch communication and provide a better customer experience. Glenbriar worked closely with us so that we could understand the nuances of voice on a data network. SAFST had some unique network challenges that Glenbriar was able to assist with and resolve.”

The ShoreTel Unified Communications solution allows SAFST to provide live answer at every branch, providing for quick and effective customer service, including creation of a Customer Service Hunt Group so that calls are quickly handled. Employees can see if someone is on the phone at another office, or call or transfer callers to another branch without any long distance charges. With Microsoft CRM integration, the CRM system launches a phone call activity when the user answers the call. SAFST also deployed ShoreTel’s Call Router so that specific incoming numbers are automatically directed to specified extensions.

About Southern Alberta Fluid Systems

Southern Alberta Fluid Systems Technology Inc. (SAFST) has been an authorized Swagelok® sales and service centre for over 45 years. SAFST offers a broad line of high quality Swagelok® products and a wide variety of services tailored to the individual needs of its customers. SAFST carries substantial inventories that are supported by Swagelok’s regional distribution centres and world-class supply chain management. SAFST’s team focuses on developing cost effective solutions for its customers. By providing customers with high-quality products and services, SAFST has established long lasting relationships with its customers. SAFST’s goal is to be the supplier by which all other suppliers are measured.
